

Ornamental Decorative Calcium Silicate Boards (Wave pattern)

Cera-Art Linebright (Noncombustible) NM-3348

Noncombustible boards

Noncombustible decorative boards

Hospital waiting room

Features

- Noncombustible decorative boards with a line pattern on the surface
- Robust coating—easy to clean, resistant to detergents
- Tough, dependable surface—less prone to scratching than gypsum board
- Easy to process using standard tools, such as cutters and files
- More resistant to water than gypsum board—suitable for areas in which water is used
- Not classed as formaldehyde emitting materials, warning labels not required

Uses

- ◆ Interior finishing in wash rooms, entrance halls, utility areas, etc.
- ◆ Excellent reputation as material for use in commercial and transportation facilities, such as shops, showrooms and concourses

These uniquely impressive products bring an enhanced ambience of quality to any space

The line pattern on the surface creates a unique impression of softness and quality.

This product is ideal for a wide range of original design concepts, including traditional Japanese and modern themes.
